## EDUCATION

### Data Analytics (Bootcamp)

#### Le Wagon

📅 08/2024 - 11/2024 📍 London, United Kingdom

- Enhanced my skills Python, SQL, and DBT for data analysis, working on projects that helped make better business decisions.
- Developed clear data visualizations in Looker Studio and Power BI, and explored machine learning techniques to gain insights and support decision-making.

### B.Sc. Computer Science (1st)

#### Manchester Metropolitan University

📅 09/2021 - 06/2024 📍 Manchester, United Kingdom

- Databases: Explored database design and management using MySQL and PHP, gaining hands-on experience in creating and optimizing databases for efficient data retrieval and storage.
- Artificial Intelligence: Utilized AI algorithms in R, learning how to apply machine learning techniques to real-world problems.

## PROJECTS

### Movie Analysis

📅 10/2024 - 10/2024

🔗 [https://github.com/Zakir09/Movie\\_Analysis](https://github.com/Zakir09/Movie_Analysis)

- Analyzed box office performance of 7,200 movies to identify trends and factors influencing success, focusing on the US and UK markets.
- Tech Stack: Python, Pandas, SQL, Looker Studio, Data Visualization tools.
- Cleaned and extracted data; produced visualizations on genre performance; and presented insights on budget and profitability.

### AI UK Travel Assistant

📅 01/2024 - 04/2024

🔗 <https://ai-travel-guide-30f005e79499.herokuapp.com/>

- Produced an AI-powered UK Travel Guide Chatbot that offers personalized, real-time travel recommendations to help users explore UK destinations.
- Tech Stack: Python, Flask, and SpaCy for natural language processing, integrated APIs (Google Maps, Yelp, OpenAI) for dynamic travel data, and deployed on Heroku with GitHub for version control.
- Led full-stack development and deployment; designed custom NER models for location and activity recognition; conducted user research and usability testing; and iterated features based on user feedback.

## SUMMARY

I am a first-class Computer Science graduate from Manchester Metropolitan University, with experience in Python, Java, and data analytics. I am knowledgeable in AI development whilst also possessing excellent communication and teamwork skills, demonstrated in both academic and customer service roles. Passionate about technology, I am eager to gain industry experience and contribute to innovative tech environments.

## SKILLS

Python, SQL, Data Analysis, Data Visualization, Machine Learning, Data Modelling, BigQuery, GCP, DBT, Power BI, Data Extraction, Data Storytelling, Relational Databases, Algorithm Development, Software Development, Java, C#

## EXPERIENCE

### Sales Assistant

#### Miniso

📅 10/2022 - 01/2024

📍 Manchester, United Kingdom

- Processed over 100 product packages per week, ensuring accurate stock checks and quality condition.
- Assisted an average of 30 customers daily, offering product advice and resolving inquiries.
- Increased upselling opportunities by understanding customer needs, contributing to a 10% boost in sales.

### Customer Assistant

#### YMCA Charity Shop

📅 06/2021 - 09/2021

📍 Oldham, United Kingdom

- Created a welcoming space by helping customers and organizing displays, which encouraged more community support for the shop's mission.
- Managed an average of 15 customer inquiries per shift, consistently receiving positive reactions from customers by delivering clear and helpful responses.
